

Simple Setup Guide

1. Create Virtual Environment

```
python -m venv shader_tutorial_venv
```

1.1 Allow script execution

```
Set-ExecutionPolicy RemoteSigned
```

2. Activate Virtual Environment

PowerShell:

```
.\shader_tutorial_venv\Scripts\Activate.ps1
```

Command Prompt:

```
shader_tutorial_venv\Scripts\activate.bat
```

3. Install Requirements

```
pip install -r requirements.txt
```

4. Run Python Files

Verify installation:

```
python verify_environment.py
```

Run tutorials:

```
python shader_intro.py
```

```
python shader_colors.py
```

Or use the launcher:

```
python run_tutorial.py
```

Quick Start (One Command)

```
setup_environment.bat
```

This automatically creates the venv, installs packages, and verifies the setup.

Done! Your environment is ready to use.
